

# How to get IDS\_certified

## Benefit and Steps

## **IDS\_Certified:** Establishing Trust for the Data Economy

Trust is the basis for successful collaboration between partners. In business as well as in social life. Collaboration is the core of IDS. Therefore, it is necessary to establish trust between all IDS participants as a key enabler for a thriving data economy. We designed a process that will establish this trust: the IDS certification. By defining a standardized level of security related to technical and organizational aspects in an entirely transparent process the IDS certification ensures security for everyone. The IDS certification is of fundamental importance for a trustworthy and sovereign data exchange.

**Get IDS\_certified NOW!**

We are happy that you decided to get IDS certified. Follow these **easy three steps** to start the process:

**1**

**We will consult you on the process and help you find the perfect partner.**

**2**

**Onboarding session with your Evaluation Facility. You will get your individual audit road map.**

**3**

**The Evaluation Facility will start the audit process and collaborate with you on collecting all necessary documents and information.**

The Evaluation Facility conducts the audit, while the Support Office is monitoring the process, manages the quality assurance and provides guidance to you throughout. After a successful audit we will present you with the certification of completion.
